

Deaf Children Can Speak

“Vital Information for Parents Who Need to Know”

Mission Statement

It is the mission of this organization to help bridge the gap from a world of silence to a world of excellent speech, language and cognitive skills for today's young deaf and hard of hearing children.

We are here to help parents open the door to their child's future and provide the necessary tools to communicate in today's hearing world.

As parents we hold the key to this door which remains shut.

Knowing what to do is the first step; acting upon it is the most important step.

We are here to help.
